

ANNOUNCEMENT OF MedeA Users Group Meeting

21-23 October 2009 in Washington, D.C.

It is our great pleasure to invite you to our annual MedeA Users Group Meeting in Washington, D.C. The Materials Design team looks forward to meeting with our software users and invited guests for technical and scientific presentations, discussions and exchanges of personal experiences.

We are once again planning a **hands-on MedeA workshop** Wednesday, 21 October 2009. You will have the opportunity to get a **general introduction to MedeA and VASP5.2**, work on specific application examples and discuss technical details with our support team. Because we provide a limited number of MedeA workstations, please let us know as soon as possible if you would like to participate.

Everyone is invited to join us for an **informal reception** Wednesday evening, 21 October.

Scientific and technical meetings follow Thursday and Friday, October 22-23, with presentations by invited speakers and customers, in-depth technical sessions on VASP5.2 and MedeA, new MedeA software features and an in-depth discussion of current and future developments.

Please help us in our planning and **let us know by end of May** if you are able to *accept* this invitation, *planning to attend*, or *cannot participate* at this date. (Just send an email to hschweiger@materialsdesign.com). We would be thrilled if you can share some of your work at the Users Group Meeting, so please send us a title of your talk.

Look forward to receive more information on the program, venue and travel arrangements based on your timely response.

We are looking forward to hearing from you!
